### The Pass 14 Years Ago

(From the Frank Paper 1905)

November 9, 1905—Jake Whittier, who with Robert Robinson and others is interested in the Crawford Bay iron property, received news by Monday's mail that the property had been sold at a good figure. Jake bought the Moitz interest for a pittance and will realize more than twice as many thousands as he paid him. Hecks of dollars for it.

Deputy Postmaster "Dick" Jordan was laid up several days this week with a bad case of quinsy.

The case of erecting the tank on top of the hill at the rear of the snailery is in progress. The big stack will soon loom up, a picturesque sight in the community.

J. M. Craig ("false alarm"), an expert printer who has held important positions in many large offices in this country and the States, arrived Sunday to take charge of the mechanical department of The Frank Paper.

John P. Marcellus was the successful candidate (Liberal) in Thursday's elections of a member to represent the Pincher Creek constituency in the first legislature of the province. Betmans gave Marcellus 548, Sherman 429 and Kennis 400.

John M. Willoughby, one of the best known pioneers of the Pass and Foot-hills, died Thursday morning at the Pincher Creek hospital of Bright's disease.

W. H. Jenkins, working at Lille, met with an accident on Monday in which he sustained injuries which it is feared will have fatal results. He sustained a fracture of the spinal column and now lies in a critical condition.

News from the oil fields at the Kootenay Lakes seem to indicate that the hope that makes the heart sick is to vanish, for at last a paying well has been struck on the lake shore a few miles this side of Oil City.

The Rev. T. M. Murray is considering a proposal to open a club in Frank for young men. Realizing the fact that there are many young men in the camp living alone who have practically no place to spend their evenings except at the hotels, Mr. Murray thought some place where they could spend a quiet evening reading or playing games would be appreciated. He accordingly suggested turning the large room at the rear of the auditorium of Knox church into a club.

The tenth anniversary of the marriage of Mr. and Mrs. H. S. Polletier, of Blairmore, was celebrated by a tin wedding on Friday evening.

Joseph Emmerson, of the West Canadian Collieries' office staff at Blairmore, leaves in about two weeks on a visit to his home in England.

James W. Ashdown is quite ill at Dr. Malcolmson's hospital. Mr. Ashdown collapsed Tuesday evening from being much run down from over work and contracting a bad cold. For a time it was feared his condition was critical, but he is now considerably improved.

An amusing incident is reported to have occurred at Blairmore on election day. A citizen of foreign birth, evidently endowed with a keen sense of humor and who had listened Tuesday evening to the claim of one of the candidates that money was being used in the campaign, walked into the polling booth, and with a long face enquired of the returning officer if that was the place where they bought votes.

Business places and many private houses at Blairmore are now being lighted by The Pass Power & Lighting Co.

November 16—One of the most distressing and accidents that has ever occurred in The Pass was that which brought death in a tragic manner on Monday evening to Jesse Duncan, the thirteen-year-old son of Mr. and Mrs. L. T. Sistrum, of Blairmore. The lad had been crushed by being struck by a runaway carriage at the McLaren saw mill, and died an hour or two afterwards from loss of blood and shock.

The wife and family of Charles Dunlop arrived at Coleman from Fernie on Saturday last.

Agent Louis Dutil, of Blairmore, has been taking his vacation the past fortnight, and accompanied by Mrs. Dutil is visiting at the coast.

The initial number of The Herald, which has just been founded at Lethbridge by Messrs. Simpson and Bennett, and which is the latest publication to seek a home on the Crow's Nest line, has reached this office.

The first issue of the Alberta Gazette is off the press, bearing date October 1st. The issue will be printed as a souvenir of Alberta's admission to confederation.

Concluded on Page Four.

### Death of William Cross

The death of William Cross occurred on Monday morning under particularly sad circumstances. Mr. Cross had since his return from overseas been an employee of the West Canadian Collieries, and had not been known to miss a shift. On Sunday he came of shift at 4:30, and repaired to his room, and after washing up and changing several garments he came down town to the veterans' club, where he engaged for a few moments in a game of checkers with a chum. Before the game was finished, his partner was called to the bathroom, and was soon followed by Cross. In running down stairs, Cross lost his balance on the steep steps and fell to the bottom level first, his fist hitting the concrete floor beneath, while his head came in violent contact with a step. Several helping hands rushed to his assistance and found him unconscious, while blood was flowing freely from his ear. Drs. Olivier and Baker were summoned and soon arrived on the scene, and after viewing the man ordered him removed to the Blairmore hospital. He never regained consciousness and died on Monday morning at 7 o'clock.

Mr. Cross leaves a wife and daughter to mourn the loss of a loving husband and father. But a few months ago he returned from overseas, where he won the reputation of being one of the best soldiers. He had been a resident of The Pass for a number of years before enlisting and was well and favorably known.

Funeral took place at Blairmore on Wednesday afternoon, held in charge of and largely attended by members of the G. W. V. A. Service was conducted at the Anglican church by the Rev. H. Clay, and interment took place in the general Protestant cemetery at 4:30.

The local cadets were in attendance and sounded the Last Post at the graveside.

### Picked Up By The Wayside

They were discussing music and reference was made to jazz and the action of the Carleton authorities in prohibiting jazz music being played at a dance. "Jazz music is unholy," remarked one, "it ran the bad in a person. It is a suitable music for the St. Vitus dance. While good music charms the savage breast, jazz demoralizes the civilized breast."

### Coaxing Church Members

A pound of sugar was offered to every regular member or visitor attending the meeting of the Men's Bible Class in Holy Trinity Presbyterian Church in Philadelphia a week ago. This new incentive to worship brought out a record-breaking attendance of 177 men, among whom were 74 visitors. The sugar was dealt out with larger quantities given as prizes to those bringing the most guests. More than 200 pounds were distributed.

### Death of Mrs. John Eddy

The death of Mrs. Eddy, beloved wife of John Eddy, of Beaver Mines, occurred on Saturday morning last, following a short attack of influenza and pneumonia. Mrs. Eddy leaves a husband and nine small children, the eldest of whom is but fifteen years.

### Notice

A meeting of members of the original 192nd Battalion will be held at the Town Hall, Blairmore, on Friday evening, February 12, 20th, at 8 o'clock, when the question of organizing a district

band will be considered. Quite a number of instruments are in charge of the band trustees, and considerable funds, sufficient to build up a band that would be a credit to Southern Alberta are available. There is also an abundance of instrumental talent in the district that could be commissioned. All members of the 192nd and others interested in this important movement are requested to attend this meeting.

### Notice

Duncan McDonald, Esq., District Inspector of Mines, Calgary, will be in the Blairmore district between the 17th and 20th days of

February, 1920, for the purpose of conducting examinations for certificates especially to men that took a course of mine rescue work during 1919.

Any person who desires to take advantage of the instructions and training preparatory to this examination should endeavour to visit the mine rescue car at present in Hillcrest. Mr. McDonald will visit the outlying districts on one of the above dates which will be definitely advertised later.

ED. ROYLE, Superintendent Mine Rescue Car No. 1 Blairmore District.

Miss B. Baird is recovering from a several weeks' illness.

## Taking Action To Improve the Financial Situation

Ottawa.—Gradual reduction of Dominion notes in circulation, it is understood, is planned by the government as a means of improving the financial situation. The last returns issued by the finance department show that on January 19 there were Dominion notes in circulation amounting to \$318,690,089. They were secured in gold to the extent of \$144,821,062, and in approved securities, under the terms of the Finance Act of 1914, to the amount of \$154,237,000. The gold is therefore about 55.9 per cent. of the total issues.

At the end of the financial year total Dominion notes outstanding were \$298,058,697. Gold amounted to \$116,014,654, or 38.9 per cent. of the total issue, and of the Dominion rates outstanding, \$144,428,000 were secured by the deposit of approved securities.

The ratio of gold to note circulation, it is suggested, might be improved in two ways. In the one hand, gold might be bought; on the other, outstanding notes might be retired from time to time from the proceeds of loans or from revenue.

According to reports from London the British government is planning to reduce its note circulation by a hundred million dollars.

The situation which has arisen as a result of the breakdown in exchange continues to monopolize attention in official financial circles. It is a situation that generally follows a war. During the civil war the gold value of American greenbacks dropped to 38.7 cents.

### Finances of Count

#### Hohenzollern

Protest Is Entered Against Plan to Restore Exile's Property.

Berlin.—Efforts to keep intact the fortune of former Emperor William are condemned in a long editorial printed by the Vorwarts. The newspaper says: "The movement is the half of a 'man who ruined Germany'."

"The bill now before the Prussian diet represents a masterpiece of old Prussian efficiency," says the editorial, "for the financial status of Count Hohenzollern is placed on the basis of his right to property, while nothing is said as to his guilt on the political situation. It is perhaps, well to remember that the national constitution gives the government the right to seize private fortunes."

### Must Banish Ex-Kaiser

Sir Auckland Geddes Says Allies Will Put Former Emperor on Trial.

London.—Sir Auckland Geddes, Minister of National Service and Reconstruction, speaking at Andover, said the government intended to put the former German emperor on trial and carry out whatever penalty was provided. But, he added, if Holland definitely declared her intention on the basis of international law, to provide asylum for him within Dutch territory, then he must say the former ruler could not reside on Dutch territory in Europe, and Holland must put him on some island belonging to her outside of Europe.

Many a loser makes good by making a bluff at winning.

## Famine Conditions in Petrograd Are Terrible

London.—Petrograd is described as a city suffering from famine, cold, disease and robbery, in a report just made by Professor Zeidler, of the Russian Red Cross, who has investigated conditions in the capital.

"Owing to want of fuel, the capital is becoming a desert," he says. "In a few houses only there are still some inhabitants, and even these generally live in their kitchens. Famine conditions in the city are terrible. If the population had not already accustomed itself to feeding on what people in normal circumstances never eat at all, they would have no food whatever."

"The water supply has stopped owing to the want of fuel, and the in-

### Heavy Storm in North Atlantic

Sea Resorts Suffer Considerable Damage from Tremendous Waves

New York.—Huge waves, rolled up by a storm, have been sweeping the North Atlantic coast, and towns along the shore have been trying with indifferent success to dig themselves out of the deepest snow-drifts of years.

Damage done to the sea resorts and summer homes along the New Jersey and Long Island coasts was estimated at hundreds of thousands of dollars.

Shipping remained at anchor or moved with the utmost caution. In the landlocked waterways around New York huge ice floes menaced navigation. The steamer Maine, of the New England Steamship Company, was driven ashore on the north end of Long Island, and four other sound liners were reported creeping along through fields of ice.

Cold, snow, ice and high tides have made it almost impossible to transport coal from the digester reserve at Perthamby to New York, and the cities face a fuel famine.

While mountainous seas were battering the coast, the highest tide ever recorded in New York harbor caused floods along the Hudson and Harlem rivers. Flooded ferry boats on the New York and New Jersey sides of the Hudson hampered still further transportation lines already struggling with deep snow.

Serious damage was done at Rockaway Beach, where two modern summer hotels, thirty bungalows, a forty-suite apartment house, a bath house and numerous small structures were washed into the sea. Traffic in the snow-filled streets in New York dwindled to 15 per cent. of normal.

### Former German

#### Ships to Be Sold

Vessels Must Be Kept Under American Flag and Subject to Army Needs

Washington.—President Wilson has approved the sale of the 30 former German passenger vessels, for which the shipping board recently received bids, and negotiations for the sales will proceed, Chairman Payne, of the board, announced.

To meet obligations of the War Department, which recently protested against the sale of certain of the liners as needed in its transport service, Mr. Payne said a clause would be inserted in the sale contracts specifically and emphatically keeping the vessels under the American flag and subject to the needs of the army in case of a national emergency.

To Confer on Immigration Plans

London.—Commissioner Lamb, of the Salvation Army, will arrive in Canada in a few days to confer on the government's immigration policy. The commissioner anticipates no difficulty in continuing Salvation Army plans, as the government scheme follows closely the lines laid down by the Salvation Army for its emigration work.

habitants draw their supply from the Neva or the canals, or use melted snow. Spotted typhus and Spanish influenza with various complications have put an end to the sufferings of many unfortunate people. There are no medicines to be had, at all. Only few hospitals are still open. Electric lights are permitted from five to eight p.m. only. Tram cars run at certain hours and on only routes needed by the Bolsheviks. Authorities are powerless to guard public safety. Gangs of robbers are at work in the deserted quarters of the city, carrying off all that may have been left after the searches made by the Red army."

### Canadian Delegates Had Rough Journey

Arrived in Paris After Conference Had Been Adjourned Until March 2

Ottawa.—Canada's labor delegates to the Paris conference had a tempestuous trip across the Atlantic, and their arrival until after the governing body of the International Labor Office had adjourned on January 28, to meet in London on March 2. F. A. Acland, deputy minister of labor, has called to Senator Robertson that a number of important items on the Paris agenda had been laid over to be taken up at the London meeting.

The Canadian delegates found that they would be unable to secure home passage for at least forty days. Under these circumstances the Government has called Mr. Acland to remain over, so that he can take part in the London meeting. It is understood that Tom Moore, president of the Canadian trades and labor congress, will also remain in England.

### Another Excuse Offered

Hun Writer Says Sentencing of Ex-Kaiser Would Endanger Republic

Berlin.—Karl Kautsky, who investigated the causes leading to the war, writes in the Berlin Volks Zeitung: "The passing of sentence on Wilhelm (the former German emperor) before an enemy court would not alleviate the danger of a counter-revolution, but would add to it. Wilhelm would be made a martyr in the eyes of the German public, to whom he would appear as a man sentenced, not for this crime or that, but for being a German. His popularity would suddenly soar upwards tremendously and he might become a dangerous preacher in opposition to the German republic."

Here Kautsky is of the opinion that the sentence should not go beyond ordering Holland into appointing a residence for the former emperor, on some island where conspiracies with his German friends would be very difficult.

### Wilson Found Guilty

Former Member of R.N.W.M.P. Accused of Murder of Wife

Saskatoon.—John Wilson, former member of the R.N.W.M.P., was found guilty of murdering his wife, Mary Wilson, by a jury in King's Court Bench here. Chief Justice Eastman immediately sentenced him to die upon the gallows at Prince Albert jail on April 24.

"The jury deliberated one hour and fifty minutes. On receiving the verdict, Justice Eastman asked Wilson if he had anything to say. Immediately his appearance, of apathy, which has featured the trial, passed and, jumping to his feet, he grasped the front of the docket and replied: "Yes, sir, I wish to protest against the low-down, dirty methods of the policy in taking advantage of my condition of mind and to obtain certain information from me."

Sentence was then pronounced and Wilson was hustled from the court, and was in his cell four minutes after the word "Guilty" was rendered.

Wilson's counsel offered no defence. The prisoner was physically unable to stand the strain of going into the box, he told his Lordship.

U.S. Manufacturers In Majority

Ottawa.—An interesting comparison of the number of outside manufacturing firms having branch factories in Canada has been compiled by the Canadian trade commission. This shows that while there are scarcely half a dozen British manufacturers with branch factories here, there are some 530 American manufacturers, whose products range from farm machinery and tractors to packing house products.

### Get Profit on Woolens

New York.—Arthur Williams, federal food administrator, ruled that 10 per cent. is to be the maximum profit for woolen merchants. One firm that made a profit of \$185 to a yard on material purchased for \$3.55, was given twenty-four hours to buy the stuff back, resell it at a profit only more than ten per cent, and pay their former victim \$12.5 a yard.

Berlin.—The Zwoelf Uhr Blatt asserts that Japan had intimated to the German government that Dr. Solf, former secretary for the colonies, will not be persona grata, as Germany's representative at Tokyo, the Zwoelf Uhr Zeitung says that similar difficulties are being raised in Brussels, regarding the appointment of Herr Landsberg.

W. N. U. 1302

### G. I. Shareholders And the Government

Sir Alfred Smithers Convening Meeting to Ratify the Agreement

London.—Sir Alfred Smithers, chairman of the Grand Trunk Pacific Railway, is convening a meeting of shareholders for the 19th instant to which they are invited by his company and the Canadian Government. He has issued a circular, stating that the board of directors, after long and anxious consideration, unhesitatingly accepted acceptance of the agreement. The circular says:

"The state of railway finance and working brought about by the war shows features common to the United States, Great Britain and Canada, but the United States saved shareholders' losses by requiring the companies an average income for three years. The British Government at the beginning of the war, saved the British shareholders by guaranteeing the income for 1914, but no such assistance was given by the Canadian Government to Canadian railways."

"All through the negotiations the Canadian Government pressed the liabilities of the Grand Trunk, for the Grand Trunk Pacific was the chief reason for acquiring the Grand Trunk on very moderate terms. It can be at once stated that, leaving out all other considerations, the increase of expenses, without an adequate increase of rates, has greatly aggravated the Grand Trunk Pacific position in relation to the Grand Trunk. When the Government of Canada becomes the owner of the great system that it will have when it acquires the Grand Trunk system, it can speedily bring such readjustment of rates into being as will permit of a fair return on the capital invested. The whole cause of the present difficulties of the Grand Trunk is its being required to carry on an ever-increasing business under the present prices of operating costs, without a corresponding increase in its rates, and that condition cannot be altered until the railway commission will allow an adequate increase."

### Help For Vienna Children

Italian Trains Arrive To Take Away Those in Need of Remainder of Winter

Vienna.—An Italian train has just arrived to take 2,500 children of Vienna to Milan for the remainder of the winter. The train brought several carloads of badly needed Red Cross supplies.

The departure of these children completes the tenth consignment sent to Italy, long to be expected. Virtually all the towns of Northern Italy have expressed willingness to receive some of the children into families there free of charge. Only lack of transportation facilities prevented a wholesale exodus of children from Vienna to Italy.

Thousands of children, too feeble to undertake the long journey, have been gathered in hospitals, where they will benefit greatly by the medical supplies just arrived.

### Condemns Present Dental System

Chicago.—The American Academy of Dental Science condemned gold crowns on teeth as unsanitary and productive of diseases. The organization also condemned the removal of nerves from decayed teeth preparatory to filling.

One delegate declared the present methods of extracting teeth needed to be changed. Extractions in cases of persons over 20 years of age should be made in hospitals with the same treatment accorded other operations, he said.

### Saw Socialist Spit on Flag

Albany.—A sensation was sprung at the trial of five suspended Socialist assemblymen here, when Ellen B. Chivers, a girl of 18, testified that she had seen Charles Solomon, one of the accused, spit on the United States flag during the war. She had asked by telegram for permission to retire and his resignation was immediately accepted.

Baron Von Lersner, it is explained, was relieved at his own request. The note of the entente concerning the extradition of accused Germans was in accordance with instructions he had received from Berlin. The German government had requested him to receive it, but he asked by telegram for permission to retire and his resignation was immediately accepted.

Baron Von Lersner, it is explained, was relieved at his own request. The note of the entente concerning the extradition of accused Germans was in accordance with instructions he had received from Berlin. The German government had requested him to receive it, but he asked by telegram for permission to retire and his resignation was immediately accepted.

### Airdromes For Alberta

Calgary.—The Canadian Air Board will establish two airdromes in Alberta, one in Calgary with 12 machines and one at Peace River Crossing. The airdromes are to be used for instruction and government work, according to Major McLaren, of the Canadian Air Board.

### Offer Award for Flu Cure

Denver, Colo.—The Denver Post announces it will pay \$25,000 to the physician finding a cure for influenza. The money is to be paid after the cure has been approved by the Rockefeller Foundation and the John Hopkins University, Baltimore.

## Plan Opening of New Parliament Buildings Soon

### To Build Official War Memorial for Canada

Will Take Form of Museum, Which Will Likely Be Located at Ottawa

Ottawa.—Canada's official war memorial will take the form of a museum, which probably will be erected in Ottawa, in which will be housed the war trophies belonging to the Canadian forces. At a meeting held here, resolutions were adopted unanimously recommending that there be built for this purpose "a monumental museum containing such other elements as may be necessary to give full expression to national feeling, and as an expression of the sacrifice of the dead and the greatness of our national effort."

The architect for the memorial will be chosen in a competition open to Canadian architects, and the working out of the project is placed in the hands of a commission composed of three delegates from each of the following bodies: The Great War Veterans' association, the Royal Society of Canada, the Royal Architectural Institute of Canada, the Royal Academy, and the Town Planning Institute of Canada, and the chairman of the Advisory Arts Council.

The name of the commission will be the "National Memorial Commission." Its members will serve without remuneration.

Following the formal opening, their excellencies the Governor-General and the Duchess of Devonshire will hold a reception between the hours of 4.30 and 5 o'clock.

Although only certain parts of the building will be completed in time for the formal opening, it was thought by the cabinet that there should be some formality attached to the opening of the first section, in the new buildings, and it was, therefore, arranged as outlined.

Most of the members and senators' rooms are already completed, and some of the officials of the House of Commons, having their effects moved into the new quarters.

Sir George Foster, acting premier, stated that there was no doubt that the building would be sufficiently completed to allow of the opening taking place as planned without any delay. In the meantime, all efforts are being turned to completing the essential portions of the building. While parliament will meet almost amid the din of saws and hammers, the business of parliament will be carried on while the rest of the building is being finished.

Want Government to Sink Oil Wells

Winnipeg.—That the Dominion Government should spend at least \$500,000 in sinking wells in the Athabasca oil fields to provide permanent employment for returned soldier citizens, thus obviating the necessity for charity doles, was the effect of a resolution passed at a meeting of the central branch of the Great War Veterans' Association.

Major G. W. Andrews, D.S.O., was the chief speaker.

Nature leaves a lot of work for the dressmaker to finish.

## List of Huns Wanted by Allies For War Crimes

Berlin.—Baron Von Kurt Lersner's refusal to accept the allied note regarding the extradition of accused Germans was not in accordance with instructions he had received from Berlin. The German government had requested him to receive it, but he asked by telegram for permission to retire and his resignation was immediately accepted.

Baron Von Lersner, it is explained, was relieved at his own request. The note of the entente concerning the extradition of accused Germans was in accordance with instructions he had received from Berlin. The German government had requested him to receive it, but he asked by telegram for permission to retire and his resignation was immediately accepted.

**The Longest Vessel**  
British Battle Cruiser Head 900 Feet in Length

Which is the longest ship afloat? Among merchant ships the Leviathan, 550 feet long, is the longest, with the 11,000-ton liner, the Aquitania, each 500 feet long, of the Cunard line, coming next. Among warships, the longest in commission today are the Renown and her sister, the Repulse, each being 789 feet. But the longest warship constructed is the new British battle cruiser Head, which is 900 feet in length and about 42,000 tons full load displacement. The United States navy department has designed six battle cruisers 875 feet in length.

**Governor Declines Irish Invitation**  
Calvin Coolidge, Governor of Massachusetts, declined an invitation presented by several representatives in the State Legislature to meet Eamon de Valera, President of the so-called Sinn Fein Irish Republic, who is coming to Springfield, in this State. The Governor, it was said, told the committee that he could not accept, and must decline all such invitations. He did not attend the large de Valera dining in Boston last summer, at which Andrew J. Peters, Mayor of Boston, and David L. Walsh, Senator from Massachusetts, were speakers.

Occasionally a man rises from nothing to something worse.

**"I Cannot Go"**

**BILIOUS** headache spoils many an expected enjoyment. When the condition of the liver is neglected, biliousness seems to become chronic and recurs every two or three weeks, with severe sick headaches.

Why not get right after this trouble and end it by using Dr. Chase's Kidney-Liver Pills to restore the health and activity of the liver.

Constipation, indigestion, backache, headache, biliousness and kidney derangements soon disappear with the use of this well-known medicine.

Dr. Chase's Kidney-Liver Pills

**Crown Dating**  
From 1,600 A.D.

Most Ancient One, With a Single Exception, In Europe.

The rumor, current in the European press some months ago, when the Bela Kun administration ruled in Hungary, that the Hungarian crown was to be sold, seems to have disappeared, and the later government apparently means to keep it. It was an odd circumstance, says a writer, commenting on that rumor and its disappearance, that with so much talk of discarded insignia of royalty, the one crown actually mentioned as being for sale should have been the most ancient one, with a single exception, in Europe. For whereas the German crown, for example, is comparatively modern, and was made no longer ago than 1871 for the former Kaiser's grandfather, this crown of Hungary traces back, at least in legend, to the year 1000, and the sum of 100,000 Swiss marks, about \$15,000, which last summer was circulated, reportedly as the price for which it was to be sold, does not seem particularly exorbitant.

Brazilian coconut palms live from 600 to 700 years, and the date palm from 200 to 300 years. On the Mount of Olives, Jerusalem, there are olive trees known to have been flourishing in 1099.

**DOCTOR URGED AN OPERATION**

Instead I took Lydia E. Pinkham's Vegetable Compound and Was Cured.

Baltimore, Md.—"Nearly four years I suffered from organic troubles, nervousness and headaches, and every month would have a severe attack. I took Lydia E. Pinkham's Vegetable Compound before coming to this operation. I took five bottles of it and I feel like a new woman. My work is a pleasure. I tell all my friends who may trouble of an operation. Lydia E. Pinkham's Vegetable Compound has done for me."—MRS. L. B. BARNETT, 620 Calverton Rd., Baltimore, Md.

It is only natural for any woman to dread the thought of an operation. Many women have been restored to health by this famous remedy, Lydia E. Pinkham's Vegetable Compound. A free operation has been advised that it will pay any woman who suffers from such ailments to consider trying it before submitting to such a trying ordeal.

**Trees on the Prairie**

Many Farmers Securing Trees Free of Charge From Government Nurseries

Farmers on the prairies of Alberta, Saskatchewan and Manitoba have for many years been assisted by the Forestry Branch of the Department of the Interior in obtaining suitable trees for planting on their farms. Sufficient quantities of hardy trees suited for prairie conditions to establish shelter belts around their farm buildings and gardens are furnished to the farmer free of cost. Up to the present time 53,142,425 seedlings and cuttings have been supplied to farmers in this manner. During the past five seasons the average distribution has been 4,222,615 seedlings and cuttings each year, while the average number of farmers to whom these trees have been sent has been about 4,400 yearly during the same period. Manitoba maple, green ash, caragana, Russian poplar and Russian willow are the principal varieties of trees. The seedlings are all grown at the Dominion nurseries at Indian Head and Sutherland, Saskatchewan, and is raised entirely from seed gathered in the Prairie Provinces.

**A Zulu Bride's Trouseau**  
A Zulu bride wears one dress in a lifetime—and it is her bridal gown. Papa furnishes it to get rid of the daughter, and his bank account is set back thereby about \$15. The gown is described as a "petticoat of rawhide" rubbed with grease and black clay to give it a polish and make it more durable.

W. N. U. 1302

**Fruit Growers Increase Prices**

British Columbia Sold Strawberry Crop in Advance

Fresh strawberries and strawberry jam will cost about 20 per cent. more this year than they did in 1919, and raspberries will follow suit, according to information received from British Columbia by the land and resources department, Canadian National railways. It is set forth in the statement that producers in the Gordon-Head district, B.C., already have sold 250 tons of their 1920 strawberry crop in advance at 20 cents per pound, whereas the price paid last year was 16 and 17 cents.

It was predicted that the cheapest wholesale price for strawberries this year would be \$4.50 per crate, as compared with \$3.50 and \$4.00 in 1919.

**ACHES AND PAINS QUICKLY RELIEVED**

You'll find Sloan's Liniment softens the severe rheumatic ache

Put it on freely. Don't rub it in. Just let it penetrate naturally. It gives a sense of soothing relief soon follows. External aches, stiffness, soreness, cramped muscles, strained sinews, back "cricks"—those ailments can't fight off the relieving qualities of Sloan's Liniment. Clear, convenient, economical. 35c, 70c, \$1.40. Made in Canada.

**Sloan's Liniment Keep it handy**

**India Producing Cement**

First of Three Modern Works Started in 1914

Within five years a new industry has come into being in India, which seems, at first thought, oddly out of keeping with that land of ancient ways. One does not think of cement construction as characteristic of India, yet in the years immediately before the war so much cement construction was there in progress that vast quantities of cement were being imported not only from England, but also from Germany, Belgium, Italy, Austria, and Hong Kong. Until 1914 practically no cement was made in India. Then the first of the three modern cement works was started, and now India produces about half of the cement needed for Indian construction.

The reason why so many men could not make ends meet was because they were too busily engaged in making one end drink.

**DON'T LOOK OLD FROM HERE UP**

A little "Danderine" checks ugly dandruff and stops hair falling

Get a small bottle of "Danderine" at any drug store for a few cents, pour a little into your hand and rub well into the scalp with the finger tips. By morning most, if not all, of this awful scurf will have disappeared. Two or three applications often remove every bit of dandruff and stops falling hair. Every hair on scalp shortly shows more life, vigor, brightness, thickness and color.

**Wireless Station at Bermuda**  
The British government is to open a wireless station at Bermuda for commercial business with Canada, the West Indies and the United States. A message from the governor asks the local legislature to appropriate \$500 for telephones and telegraphs to connect with the aerial plant at Daniel's Head. The colony will get one penny for each shilling of local business. The rate to Halifax will be one shilling a word.

**Hawaiian Cash Sent to Japan**  
In the fiscal year ended June 30, 1919, almost \$900,000 in international money orders were sent out from Honolulu, and all but \$10,000 of this amount went to Japan. There is also much money sent to Japan through the local Japanese banks, there being three of these in Honolulu.

**Canada's Immense Medicinal Salt Fields**

Extent of Deposits is Estimated at 9,000,000 Tons

Immense deposits of astracant have been discovered near Muskiki lake at Kaskakee Springs, on the Prince Albert branch of the Grand Trunk Pacific railway. Astracant to the uninitiated does not sound like ready money, but the Salt & Potash Company, of Kitchener, Ont., which is building an evaporating plant, declares its holdings are more valuable than if undelivered with gold.

The extent of the deposits is estimated at 9,000,000 tons, from which Glauber's salts, Epsom salts, bromide, common salt and magnesia will be obtained. The first by-product is extensively used in paper making, and a market for it stands ready in the paper mills of British Columbia. A deposit of mineral pigment also has been found which may be used in the manufacture of paint.

Some distance to the southwest of Olan, Sask., another astracant bed has been found. It is eight square miles in area and the mineral varies in thickness to a depth of eight inches.

Mrs. Dix: "I was ashamed of you, Ephraim, to see you dust the chair you sat on at Mrs. Henshaw's. I saw her little boy watching you."

Dix: "I saw him, too. I'm too old a fish to be caught on a bent pin." — Blighly (London).

**"SYRUP OF FIGS" CHILD'S LAXATIVE**

Look at tongue! Remove poisons from liver and bowels

Accept "California Syrup of Figs" only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say "California."

**Training for Settlers**

575,000 Acres Acquired By Former Service Men Taking Advantage of Homestead Rights

The Soldier's Settlement Board will shortly establish a training school for prospective settlers at Estey, Alberta, for the purpose of training former soldiers in the rudiments of successful farming, before they go out on the land. Up to the last week of 1919, loans aggregating \$1,572,332 have been made to soldiers going on the land, and 5,433 separate entries have been granted to settlers. A total of 1,444,000 acres of farming land has been given out, in grants in the western provinces alone, including 375,000 acres acquired by former service men taking advantage of their civilian homestead rights, in addition to their soldier grants. Two-thirds of the entire number have been exercised in Alberta. The board has trained 131 former soldiers, and 703 others are now in training stations, completing courses in practical agriculture, or gaining practical experience in apprenticeship to successful farmers. Seventeen thousand two hundred and eighteen returned men have taken advantage of the loaning system, and all of these have gone on the land.

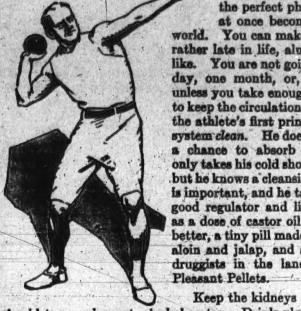

**'Baby's Own Soap'**  
A Sanitary wash  
A Soft healthy skin  
A luring fragrance

"It's Best for Baby and Best for You."

**Keeping Fit**

BY DR. SAMUEL HAMILTON.

It is because of the war that the perfect physical man has all at once become the idol of the world. You can make of yourself, even rather late in life, almost anything you like. You are not going to get it in one day, one month, or, perhaps, a year, unless you take enough outdoor exercise to keep the circulation going and practice the athlete's first principle—to keep the system clean. He does not give his body a chance to absorb poisons. He not only takes his cold shower, after exercise, but he knows a cleansing of the intestines is important, and he takes occasionally a good regulator and liver cleanser, such as a dose of castor oil, or, what is much better, a tiny pill made up of May-apple, aloin and jalap, and sold by almost all druggists in the land as Dr. Pierce's Pleasant Pellets.

Keep the kidneys in good order also. Avoid too much meat, alcohol or tea. Drink plenty of pure water, preferably hot water, before meals, and drive the uric acid out of the system by taking "Anuric" (anti-uric-acid). This can be obtained at almost any drug store.

Send a bottle of water to the chemist at Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., and you will receive free medical advice as to whether the kidneys are affected. When your kidneys get sluggish and clog, you suffer from backache, sick-headaches, dizzy spells, or twinges and pains of lumbago, rheumatism or gout; or sleep is disturbed two or three times a night. Take heed, before too late! Get Anuric (anti-uric-acid), for it will put new life into your kidneys and your entire system. Ask your nearest druggist for it or send Dr. Pierce ten cents for trial package of "Anuric."

New Zealand Thanks Imperial Navy

The last session of the New Zealand parliament passed a resolution of profound gratitude to the imperial and allied naval and mercantile marine, who by their ceaseless vigil in the face of unparalleled and unknown dangers kept open the long lines of sea communication.

**HOW TO TREAT STOMACH TROUBLE**

A Tonic Medicine is Needed to Build Up the Digestive Organs

The old-fashioned methods of treating stomach disorders are being discarded. The trouble with the old-fashioned methods was that when the treatment was stopped the trouble returned in an aggravated form. The modern method of treating indigestion and other forms of stomach trouble is to tone up the stomach and glands to their normal work. Every step toward recovery is a step gained not to be lost again. The recovery of the appetite, the disappearance of pain after eating, the absence of gas, are steps on the road to health that those who have tried the tonic treatment remember distinctly. Dr. Williams' Pink Pills are a tonic, every constituent of which is helpful in building up the digestive organs, and therefore the very best remedy for simple or chronic cases of stomach trouble. The success of the treatment is best shown by hundreds of cases like the following. Mrs. Chas. Comer, Pictou, Ont., says: "For upwards of two years I was a great sufferer from indigestion. Food would ferment in my stomach, and I would not get any real hunger sensation. Often I would be troubled with nausea, sick headache and dizziness. Nothing that I was under medical treatment, the trouble grew so bad that I would only eat when absolutely forced to, and I was in constant misery. I was finally advised to try Dr. Williams' Pink Pills and had only been using them a few weeks when I found they were helping me. I very gladly continued to use them up to the present, and they have made me a well woman, every vestige of the trouble having disappeared. I am now able to do all the work I wish to do. I strongly advise any one who may be suffering from stomach trouble to give them a fair trial, and I believe that like myself they will find a sure cure." You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail, post paid, at 50 cents a box, or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

**Leap Year**

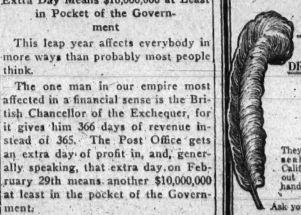

Extra Ddy Means \$10,000,000 at Least in Pocket of the Government

This leap year affects everybody in more ways than probably most people think. The one man in our empire most affected in a financial sense is the British Chancellor of the Exchequer, for it gives him 366 days of revenue instead of 365. The Post Office gets an extra day of profit in, and generally speaking, that extra day on February 29th means another \$10,000,000 at least in the pocket of the Government.

On the other hand, a good many people lose heavily by that extra day, especially those who are paid regularly once a month. All those unfortunate people work an extra day for nothing for their employers, and they have an extra day's household expenditure to face without any return for it. Tradesmen have an extra day to do business in.

**Tried Them Yet?**

"GREEN PLUME" DRIED FRUITS

They come in the 5-lb. sealed cartons from California to you without touch of wax or hands. Ask your Grocer for them.

## City Mayors Support Housing Scheme

The chances for a housing scheme in Alberta appear at present to be somewhat problematical. Premier Stewart told the delegation of mayors that he was 'up on the subject' that the government was not itself going into such a scheme. This he said was quite definite, and as to borrowing money from the dominion government on municipal securities he was inclined to think that every municipality in the province was already pretty well up to or past its borrowing power.

What the mayors of the four cities asked the premier to do, however, was to apply for the federal grant, and so make the money available for the municipalities. Local schemes and methods for using this money would be subject to revision and ratification by the government.

Mayor Hanley, of Lethbridge, who was chief sponsor for the housing scheme, said that his city did not have a definite program yet, but was waiting to see if the money would be obtainable or not. He did not think the Dominion scheme as it now stood was workable from Lethbridge's point of view, but believed it could be amended. The provincial government should get the money and leave it to the cities to spend it.

For Medicine Hat, Mayor Brown stated that a municipal housing scheme was not in favor there, but instead it was desired to have the funds available for loaning to individuals, first to returned soldiers, next to private citizens for their own building purposes, and that of all landlords who would build for renting.

It was Mayor Clark's opinion, of Edmonton, that the federal grant should be made available for moving houses to those that had water and other utility services. Edmonton had not yet decided to apply for the money, he said, but he thought that hard and fast rules for its expenditure could not be laid down uniformly.

A resolution from the Alberta Union of Municipalities, calling upon the government to take action toward securing the province's share of the grant, was submitted by Mayor Marshall of Calgary.

Premier Stewart told the delegation that he had inquired as to the present situation in regard to the grant and had found that Alberta's share of it amounted to \$1,500,000 was available in Ottawa and there would be no difficulty on that score. But it was his candid judgment that that amount of money would not do very much more than embark the provinces upon a scheme from which it would be difficult to get out.

The government was not at all anxious, said the premier, to build houses for professional men, and since the original purpose of the scheme had been to help the working man get a home he felt that the plan as so far developed would not meet the case in any very practical way.

Increased tax levies in every city and municipality in the province would be almost certain this year, the premier pointed out, and in the face of that fact it would be doubtful if new borrowing schemes would be favored. The government itself was avoiding all but absolutely necessary building until conditions and prices got back to normal, and as the building costs were at present an overhead of from twenty-five to forty per cent on all building this year would be inevitable. The burden of this would have to be carried during the lifetime of the building.

To meet these objections, Mayor Brown declared that Alberta cities needed more money to help pay the civic debts and as to the loaning out on personal security the cities would see to it that only men of good security were given loans.

Mayor Clark thought there was not much danger of losing money on the scheme.

Alderman East reported that the G. W. V. A. was in favor of the scheme and desirous of seeing it got under way in Alberta.

Mayor Marshall admitted the force of the position taken by Premier Stewart, but pointed out that in making the necessary application for the federal grant the government would not be committing itself beyond the safety-first margin. The cities would then in turn apply for such portions of the grant as they wanted, and if the scheme they advanced was not acceptable by the government, the latter would have the power to reject or revise them.

The matter was finally left on this understanding, and the government will once more face the question of whether or not Alberta will be included in the Dominion scheme. —EDMONTON JOURNAL.

## Coal Beds Formed When Alberta Was Tropical

The coal beds that furnish people with fuel were formed in an age when conditions on the earth were vastly different from what they are today. The crust of the earth was in an unstable state; it was shrinking with many incidental convulsions. The atmosphere was heavily charged with water vapor, and so loaded with carbonic acid as to be almost unbreathable.

The sun was bigger, and much hotter then, and temperatures all over the world were higher than in the torrid zone now. Most of this country was covered with swamps. All of those circumstances, of course, were favorable to the development of plant life.

What is now Alberta was a flat region, devoid of mountains. The great ridges of the Rockies probably had not been uplifted. Indeed, large parts of it are formed of carboniferous beds folded into ridges which originally must have been flat.

The steaming, vaporous landscape, over which were scattered many shallow ponds, offered everywhere to view an extraordinary luxuriance of vegetation, consisting mainly of plant forms infinitely far to us today. Extremely abundant were gigantic mosses resembling in kind our little clump mosses, but vastly magnified, attaining the size of forest trees with trunks sometimes 120 feet long and ten feet thick. These contributed more material than any other plant to the coal that was to be.

In the muddy ground, forming impenetrable thickets, stood monstrosities, red-like "horsetails," delicate of foliage, with stems ten feet or more in height and ten or twelve inches thick. Above them towered groups of palm-like tree ferns.

More than 500 vegetable species that helped to make the coal have been identified. Among them were gingko trees, which nowadays belong exclusively to Asia, and also pines.

In the slate strata immediately overlying coal seams commonly are found impressions of twigs, leaves and even plants. The softer bed of "canal" coal often contains entire trees, with foliage and seeds, all transformed into the kind of fossil fuel now burned. A chunk of anthracite suggests no likeness to a plant, but if it is sliced it is not this enough to be translucent, a microscope will readily show its vegetable character.

With rich soil, unlimited moisture for root and leaf, a temperature more than tropical, and an atmosphere laden with carbonic acid (which is to a plant what oxygen is to an animal), no wonder that the vegetation of that ancient epoch flourished. Growing, falling and decaying, each succeeding crop made the bed richer for the plants that were to follow.

This process did not go on without interruption, however. It might continue for several centuries, and then vast areas would sink and remain for a long period covered by water. From the water sand and silt would be deposited. Then these areas again would become land, resuming their former luxuriance of vegetation, only to be resubmerged later on. Thus the coal today is found in a series of layers, with strata of rock (representing the deposits of silt and sand), between.

Buried beneath the water and rock (air being excluded thereby), subjected to pressure and heat, the woody material underwent a slow smothered combustion, and was thus transformed into coal. An average chunk of anthracite is about 85 per cent carbon.

In some regions the average total thickness of anthracite seams is 120 feet. This represents an original vegetable deposit at least 1,200 feet thick. One can imagine the enormous length of time that must have been required for the growth of so vast a quantity of woody material.

Two carloads of Bourbon whiskey, or 24,000 bottles, and 75 barrels of real beer, valued at approximately \$200,000, were seized in the Calgary C. P. R. yards last week. The whiskey was consigned to Charles Bell, proprietor of the King George hotel, in transit from the Lethbridge brewery.

## NOTICE TO CREDITORS AND CLAIMANTS

In the Estate of THOMAS WADDELL, late of the Town of Coleman, Miner, deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the above named THOMAS WADDELL, who died on the fourth day of September, 1919, are required to file with the undersigned by the 28th day of February, 1920 a full statement of the nature of their claims and of any securities held by them, and that after that date the Public Administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

DATED this 26th day of January, 1920  
The Trusts and Guarantee Company, Limited,  
Public Administrator,  
220 Eighth Avenue West,  
Calgary, Alberta, Canada.  
H. A. HOWARD,  
Manager.

Approved—  
E. P. McEn, J.

## To General John Pershing, Commander-in-Chief American Expeditionary Forces.

Dear General:—While making all allowance for the fact that you are once more safely back in the land of tall talk, I cannot imagine how you could have the face to declare that America won the war. I know the facts of such villages as New York and Chicago have been for months wearing buttons proclaiming that proud but untrue statement. But I really thought you were too good a soldier and too fine a sportsman too indignant in such obvious hypocrisy. I should like to hear Admiral Sims upon your claim, and would not mind seeing a dollar—at current rate of exchange—that be heartily disagrees with you. Heartily, General, I am surprised!—JOHN BELL.

## Influenza

Sir,—I would ask your kind insertion of the attached. I would like to call particular attention to the sections B, C, D and E. I have no wish to heedlessly alarm the public but it is always well to be prepared.

Miss Tilley of the Nursing Mission, has kindly volunteered to look after the registration of nurses and such as are willing in any way to assist in the case of suffering humanity, provided, of course, that such services should be required.

L. Geo. DeVeber,  
Medical Health Officer.

## WARNING TO THE PUBLIC

The department of Public Health is in receipt of a telegram from Chicago, giving particulars of the serious outbreak of influenza in that city. In all probability this disease will reach our province in a short time. It is therefore advisable that the people generally should know something about the manner in which the disease is spread, as well as what personal and public measures should be taken if an outbreak occurs in this province.

## SYMPTOMS

Influenza is a germ disease, and is conveyed from one person to another by the secretions from the mouth, nose, throat and lungs. Coughing, spitting and sneezing will readily spread it. The use of common towels and cups will also spread it. Cups and other utensils in hotels and public restaurants may spread the disease.

## PERSONAL MEASURES

If cases should appear in your neighborhood, think first of prevention. Do not go into any house or place where there are any persons ill. Do not allow any person with a cold in the head to come to your house or place of business. Keep away from people who have the disease. Avoid crowds. Keep in the open air and sunlight as much as possible. Sleep in a well ventilated room with windows partly open. If you should be attacked by the disease go to bed at once. Rest and warmth are very important factors. Take warm drinks, live on fluids and send for your physician.

## PUBLIC MEASURES

All cases should be reported to the Local Board of Health, and also to the Provincial Board of Health.

The following measures should be put into force immediately by all Local Boards of Health:

- (a) Provide means for a rapid expansion of hospital facilities. A survey should be made of the city, town or village and a suitable building located which might be taken over and used as a hospital in case of any emergency.
- (b) Registration of all available nurses trained and untrained.
- (c) Emergency training of volunteers for temporary nurses.
- (d) Use of specially selected trained nurses for supervisors of the untrained.
- (e) Registration of voluntary home-helps. —Lethbridge Herald.

Continued from First Page.

## The Pass 14 Years Ago.

It contains Lieut.-Governor Bulger's proclamation and record of the following heads of departments:

Deputy Minister of Public Works—John Stocks, of Calgary.

Deputy Minister of Agriculture—George Harcourt, of Edmonton.

Acting Deputy Attorney General and Clerk, and Clerk of Executive Council—John Kenneth McDonald, of Edmonton.

Provincial Auditor—E. W. Barley, of Edmonton.

Acting Deputy Treasurer—James Thomas Murray, of Edmonton.

Acting Deputy Provincial Secretary—George Harcourt.

Director of Surveys—C. C. Charlesworth, of Edmonton.

Deputy Minister of Education—Donald Stewart Mackenzie, of Edmonton.

Deputy Provincial Secretary—Harold William Hammett Riley, of Calgary.

Inspector of Coal Mines—Frank B. Smith, of Calgary.

November 30—Walter Fisher, formerly of F. Burns & Co. here, but now stationed at Blairmore, expects to leave in about two weeks for a visit to England. He will be accompanied by his brother Jack.

December 7.—The government has ordered the building of a wagon road across the rock slide, and work will begin at once.

The Western Canada  
Colonization Association

The first steps in the organization of the Western Canada Colonization Association, a body which aims at the concentration of the efforts of the four western provinces in an aggressive colonization scheme backed by a subscribed fund of half a million dollars, were taken at a recent meeting of the special committee of the Alberta municipalities held in the council chamber of the city hall. The meeting, which was attended by representatives of the various cities of the province, the boards of Trade and the Alberta Industrial Development Association, drafted a number of resolutions which outline the proposed organization and will be placed before the convention which is being called to deal with the matter in Edmonton on February 18th, in conjunction with the general yearly meeting of the Alberta Industrial Development Association.

Invitations to this meeting are being sent broadcast through the province, but the limited time available makes it certain that many of those interested will not receive notices. The committee has issued a general invitation through the press to all interested in the colonization of this country to be present at the Edmonton meeting on February 18th.

During the meeting, some interesting discussion developed regarding immigration and the policy which should be followed out in this country. All the members of the committee agreed that the prime factor in the whole idea was that a settler should be followed up after he arrived in the country. It is the purpose of this organization not only to bring settlers to this country, but to keep in touch with them after they arrive and give them every assistance. It was pointed out that many settlers quit the country, when they might be held here if some organization was interested enough in their success to find them more suitable districts.

Speakers pointed out that the association could accomplish what the government could not undertake, chiefly in the disposal of the vast tracts of private held lands in the west, most of it within easy reach of the railways. Allan Cameron, of the department of natural resources, C. P. R., stated that the amount of land held in the west was surprising. An organization such as the one proposed was the only agent which could successfully settle people on this class of land.

Among those present at the meeting were: Mayor M. A. Brown, Medicine Hat; Aldermen Fred Johnson, John Wardrop, Canadian National Railways, Winnipeg; W. A. Whyte, Canadian National Railways, Calgary; Col. Nelson Spencer, Medicine Hat; Commissioner H. W. Meach, Lethbridge; Brig. Gen'l H. F. McDonald; T. A. Hornbrook, Pres. Calgary Board of Trade; Col. G. C. Porter, Winnipeg; Commissioner Freeman, Lethbridge; Commissioner A. G. Graves; Commissioner Sams; E. L. Chadleigh, Pres. Board of Trade, Medicine Hat; Dr. Chryslar, Carstairs; Chas. Pringle, Speaker of the Provincial House; Mayor Fawcett, Macleod; J. E. Brown, Edmonton; Allan Cameron, C. P. R.; J. S. Rose, Sec'y Lethbridge Board of Trade.

## A Prohibition Tale

A B. Paul man tells of a Swedish farmer in Minnesota who was taken suddenly and violently ill on one occasion. His wife telephoned for a doctor. "If you have a thermometer," answered the physician, "take his temperature. I will be there presently to see him." When the doctor arrived, the wife met him at the door. "How is he?" asked the doctor.

"Val," she said, "I ban put the barometer on him lak you tal me, and it say 'very dry,' so I give him a pitcher of water, and now he ban gone back to work."

## Information Desired

The militia authorities are desirous of obtaining the present post office addresses of officers, warrant officers and non-commissioned officers, of the following branches of the service, who have served in the expeditionary force overseas:—Viz—Canadian Field Artillery, Canadian Army Service Corps, Canadian Engineers, Canadian Army Medical Corps and Canadian Army Veterinary Corps.

Those who are desirous of joining the new units to be organized in Alberta are invited to send, in addition to the post office address, their rank, name and C.E. P. unit, previous militia unit and indicate what branch of the militia they are now desirous of joining. The organization

of the militia is now proceeding and officers and others interested are requested to communicate with the A. A. & O. M. G., Headquarters, M. D. 13, The Armouries, Calgary.

A number of officers who were demobilized elsewhere than in Alberta have developed sending in applications for transfer to C. E. P. reserve and completing the war service return. Necessary forms can be obtained on application to headquarters M. D. 13.

About 200 recruits are required for the permanent Machine Gun Brigade at Kingston, Ontario. These recruits should be men who have served in the Machine Gun Corps, overseas, in the late war, and not under 20 years of age. Before attestation, the applicants are to be inspected by a qualified machine gun officer. Recruiting officers are under for all branches of the permanent force:

Calgary: Capt. J. R. Sparks, L. S. H. (H. C.) The Armouries, Calgary, Alberta.

Edmonton: Major G. Howland, 101st Regt. E. F., The Armouries, Edmonton, Alberta.

How to Tell if You  
Have the Influenza

And What Steps to Take for its  
Relief and Cure

## HOW TO TELL.

There is as yet no certain way in which a single case of influenza can be recognized; on the other hand, recognition is easy where there is a group of cases. In contrast to the outbreaks of ordinary coughs and colds, which usually occur in the cold months, epidemics of influenza occur at any season of the year; thus the recent epidemic raged most intensely in Europe in May, June and July of 1918. Moreover, in the case of ordinary colds, the general symptoms (fever, pain, depression) are by no means as severe or as sudden in their onset as they are in influenza. Finally, ordinary colds do not spread throughout the community so rapidly or so extensively as does influenza.

In most cases a person taken sick with influenza feels sick rather suddenly. He feels weak, has pains in the eyes, ears, head or back, abdomen, etc., and may be sore all over. Many patients feel dizzy, some vomit. Most of the patients complain of feeling chilly, and with this comes a fever in which the temperature rises to 100 or 104 Fahrenheit. In most cases the pulse remains relatively slow.

In appearance one is struck by the fact that the patient looks sick. His eyes and the inner side of his eyelids may be slightly bloodshot, or "congested," as the doctors say. There may be running from the nose, or there may be some cough. These signs of a cold may not be marked; nevertheless the patient looks and feels very sick. In a number of instances during the recent pandemic a large proportion of the cases of influenza showed an intestinal (diarrheal) type of infection.

Ordinarily, the fever lasts from three to four days and the patient recovers. But while the proportion of deaths is usually low, in some places the outbreak is severe and deaths are numerous. When death occurs it is usually the result of the development of a pneumonia or of some other complication.

## WHAT TO DO.

It is very important that every person who becomes sick with influenza should go home at once, go to bed and send for the doctor. This will help keep away dangerous complications and will, at the same time, keep the patient from scattering the disease far and wide. It is highly desirable that no one be allowed to sleep in the same room with the patient. In fact, no one but the nurse should be allowed in the room.

If there is cough and sputum or running of the eyes and nose, care should be taken that all such discharges are collected on bits of gauze or rag, or paper napkins, and burned. If there is diarrhea, great care should be taken to prevent spreading the disease through soiling of the hands, clothing, or bed linen. Practically the same precautions that a nurse takes when attending a case of typhoid fever should not be instituted. If the patient complains of fever and

headache he should be given water to drink, a cold compress to the forehead, and a light sponge bath.

Only such medicine should be given as is prescribed by the doctor. It is foolish to ask the drugist to prescribe, and may be dangerous to take the so-called "safe, sure and harmless" remedies advertised by patent medicine manufacturers.

If the patient is so situated that he can be attended only by someone who must also look after others in the family, it is advisable that

such attendant wear a wrapper, gown or apron over the ordinary house clothes, while in the sickroom, and slip this off of and wash and disinfect his hands when leaving the sickroom to look after the others. The patient should have separate dishes, and these should be sterilized with boiling water after use.

Nurse and attendants will do well to guard against breathing in dangerous disease germs by wearing a simple fold of gauze or mask while near the patient.

## NURSES ADVISE

Zam-Buk, because they have proved that it does what is claimed for it. Miss E. J. Dorey, resident nurse of 3220 Michigan Ave., Chicago, says: "I have a patient who suffered terribly with piles. Zam-Buk is the only remedy that gave her relief."

"I have used Zam-Buk myself for the same ailment, also for sores and burns, and have the greatest confidence in it."

## Zam-Buk

### Growing Power Of Western Canada

A recent Ottawa dispatch reveals the fact that, according to official estimates, Quebec continues to outstrip Ontario in increase in population and is steadily closing up the gap between the two provinces in point of numbers of people. This is a development which has been in progress for some years now, with the result that Ontario is gradually losing that preponderance of political power which it once enjoyed in Ottawa.

As is well known, the basis of representation of the provinces in the House of Commons is fixed by the British North America Act, which provides that Quebec shall always have 65 members, and each of the other provinces such a number as will give the same proportion of representatives to its population as the number 65 bears to the population of Quebec, and it is also provided that following each decennial census a redistribution of representation shall take place on the basis of the population figures thus ascertained.

Prior to the census of 1901 the unit of representation for all Canada was 22,900; that is, each group of 22,900 people was entitled to a member at Ottawa. This gave Ontario 92 members, Quebec 65, a difference of 27. As a result of the 1901 census, and the increase which had taken place in Quebec's population, the unit was raised to 23,367, with the result that Ontario's representation fell from 92 to 86, because, proportionately, Quebec's growth in population was more rapid than Ontario's. Following the census of 1911, the unit was again raised, this time to 30,819, and Ontario lost four more members and is now represented at Ottawa by 82. On the basis of the recent official estimates, Ontario will, following the census of last year, lose at least two more members, leaving it only 80.

Thus in two decades Ontario's representation will have decreased by 12, leaving only a margin of 15 between Ontario and Quebec, as compared with 27 only twenty years ago. The same change in position is taking place so far as the Maritime Provinces are concerned. Nova Scotia, which had 20 members prior to 1901, dropped to 18 after the census of that year, and to 16 following the 1911 census. New Brunswick fell from 14 to 13, and P. E. I. from 11 to 9.

The official result is shown in the West. Prior to 1901 Manitoba had only 2 members, British Columbia 4, and the Northwest Territories 4, a total of 17. The census of 1901 raised these figures as follows: Manitoba to 10, a gain of 3; British Columbia 7, a gain of 3; Northwest Territories 10, a gain of 6; Yukon 1—total 28. Following the 1911 census, these figures were again increased, and today the representation is: Manitoba 15, British Columbia 13, Saskatchewan 16, Alberta 12, Yukon 1—total 57.

Thus while in the representation of the five Eastern Provinces in the House of Commons decreased by 19 in twenty years, or an average loss of a member a year, the representation of the four Western Provinces

and the Yukon has increased by 40, or an average of two additional members a year. And if the same proportionate increase in population in the West is revealed by the census of next year—as seems altogether likely, judging from the recent official estimate of Saskatchewan's population, which places it now at almost double the 1911 figure—the voting power of the West in the House of Commons will be enormously increased, while not only relatively, but actually, that of the East will be decreased.

The effect of this growing political power of the West in the national Parliament is fraught with tremendous possibilities in the shaping of national policies and in a probable very radical change in the financial and fiscal policy of the Dominion. This increased power in national affairs, coupled with the pronounced tendency of western people not to divide upon old party lines, but to unite upon great questions of principle and policy irrespective of former party divisions and views, clearly indicates that a new realignment is about to take place and that all former political conditions are due for a shake-up.

The incidence of population is, therefore, bound to have a profound effect on future Canadian policy. This will be true not only as between West and East, but is markedly in evidence within the boundaries of the old provinces. Ontario is becoming more and more an industrial centre, where the populations of the manufacturing cities and towns are growing while the rural population is declining. Quebec, too, is developing rapidly in an industrial sense, but in that province, unlike Ontario, agriculture is also expanding. In fact, Quebec is forging ahead of Ontario in more than population, thanks to the far-reaching and aggressive good roads and agricultural policies inaugurated by the provincial authorities. As a result, the natural resources of Quebec are being more rapidly and scientifically developed than are those of any other province at the present time.

Students of Canadian affairs, and those interested in our national development, may well follow with exceptional keenness the changes now being wrought in all national, financial and economic policies as the direct outcome of western development and growth in population, influence and political power.

**Catarrhal Deafness Cannot Be Cured**—by local application, as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by the use of **HALT'S CATARRHAL MEDICINE**, which acts through the blood on the mucous membrane of the system. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, it has a tendency to close, and hearing is lost. Unless cured, it results in deafness. It is a disease of the blood, and when the blood is purified, the tube is restored to its normal condition, hearing is cured, and the patient is cured. Many cases of deafness are caused by Catarrh, which is an inflammation of the blood. **ONE HUNDRED DOLLARS** for any case of Catarrhal Deafness that cannot be cured by **HALT'S CATARRHAL MEDICINE**. The T. J. Cheney & Co., Toronto, Ont.

**She Knows Whom He Meant**—An architect remarked to a lady that he had been to see the great painter in the church. "Don't mention names," the lady replied. "I know the man you refer to."—Houston Post.

**Minard's Liniment Cures Garget in Cows**—

**How Frost Affects Foods**—An egg expands when it is frozen and breaks its shell. Apples contract so much that a full barrel will shrink until the top layer is a foot below the chime. When the frost is drawn out the apple assumes their normal size and fills the barrel again. Certain varieties are not appreciably injured by being frozen if the frost is drawn out gradually. Apples will carry safely in refrigerating cars while the mercury is registering fully 20 degrees below zero. Potatoes, being so largely composed of water, are easily frozen. Once touched by frost they are ruined.

### Clear Your Scalp and Skin With Cuticura

"After shaving and before bathing touch dandruff or irritation, if any, with Cuticura Ointment. Wash all over with Cuticura Soap and water, using plenty of soap best applied with the hands. One Soap for all uses, having a penetrating, healing, finally deaden parts with Cuticura Talcum." "The Soap, Ointment and Talcum sold everywhere."

### May Be From Other Planets

Discussing the mysterious signals described by Sig. Marconi as having been received in the form of intermissions of the Marconi wireless instruments, Sir Frank W. Dyson, astronomer royal, London, admitted that in his opinion it was quite possible to get waves from other planets. He was not prepared to go further at the present time, and left it to greater wireless experts than himself to describe the effects of such waves.

### Like a Tidal Wave

Heart Disease and Nerve Troubles Sweep the Country

Probably at no period in the world's history have heart and nerve troubles been so prevalent as they are today.

The heart can't stand the stress and strain of this busy, bustling age, and the care and worry, the anxiety and activity of business life constitute a serious danger to the nervous system.

The business of this work-a-day world goes with such a rush that the stoutest hearts and strongest nerves break down under the strain.

On the first approach of any breakdown of the system Milburn's Heart and Nerve Pills should be taken. The reconstructive power of these pills on the heart and nerve system is simply marvellous. Mr. W. A. Wright, Hoggewell Ave., Ottawa, Ont., writes: "After suffering for some time with heart trouble, I consulted a number of doctors, but got no relief. However, I read what Milburn's Heart and Nerve Pills had done for other who had the same symptoms and thought I would give them a trial. Believe me, six boxes cured me completely. I am feeling fine now, and can attend to my work every day. I can recommend your pills to anyone suffering as I did." Price 50c a box at all dealers, or mailed direct on receipt of price by **Milburn Co., Limited**, Toronto, Ont.

Livestock on farms can be most profitably increased through an expansion of Canadian meat export trade. An improvement in the quality of the live animal will be necessary if Canada is to get into a foremost place in the big European markets that are ready for our national products.

A woman of experience says it is impossible to keep children or stair carpets in place without using the rod.

### Do Corns Lead To Cancer?

As yet this has not been proved, but interested parties will find nothing better for corns than Putnam's Corn Extractor, 25c at all dealers.

### A Keeperless Lighthouse

Small Beacons Have Greatly Aided Navigation in Alaskan Waters

Along the coast of Alaska where it would be difficult to maintain reliable lighthouse keepers, there have been established many automatically flashing beacons, each of which can operate for nearly five months on one charge of gas. A lighthouse with its keeper, alone among the wildest scenery, is always a romantically interesting mark of progress. A lighthouse without a keeper, however, is, perhaps, a still greater sign of progress, in that it frees many men from the temporary necessity of standing where he might not want to be. At first some navigators were a bit slow in getting used to the quickly flashing lights. Because of the rapidity of the flash, one might hardly know whether he was coming to, or going from such a light. In the end, though, these small beacons, which cost only about \$1,800 each to install, have greatly aided navigation in Alaskan waters.

W. N. U. 1302

### New German Postage Stamps

Imperial and State Authorities Are Obligated to Pay Postage

At one time every member of the nation helping houses in Germany had the privilege of being exempt from taxation and postage. The revolution has done away with this privilege. All the princes are obliged to pay taxes and to affix stamps upon their letters like every other citizen. The government has now submitted a bill providing that the imperial and state authorities are also obliged to pay postage. Until now they had been exempt from this obligation. The Post Ministry has already ordered the stamps to be printed, intended solely for the use of the authorities. They bear the imprint "Reichsdienstmark" (stamp for imperial service), and the stamps for the federal states the imprint "Dienstmark" (service stamp).

### UP A SINGIN'!

Tomorrow will be clear and bright, if you take "Cascarets" tonight.

Ambition way below zero? Here is help! Take Cascarets tonight for your liver and bowels. You'll wake up clear, rosy and full of life. Cascarets act without griping or inconvenience. They never sicken you like Calomel, Salts, Oil or nasty, harsh pills. They cost so little, too—Cascarets work while you sleep.

### Shanghai's Prosperity

Big Staple Industries Have Seldom Had Better Year

Despite many adverse factors due to the war in Europe and the internal strife in China, Shanghai enjoyed a remarkable degree of prosperity in 1918. The big staple industries of the port—cotton mills, docks and shipping—had seldom if ever had a better year, and it would, perhaps, be difficult to say they are told, to name any particular branch of industry in which there was not good reason to be satisfied with the financial results of the year's operations. Of all business men the Japanese have reaped the biggest harvest, owing to the favorable position they occupy in consequence of proximity to the source of supply, "they have found China generally and Shanghai in particular a veritable El Dorado."—Hong-Kong Daily Press.

Some people sin a lot of times by telling the truth.

### Got a Child's Coat

By Dyeing Garment

"Diamond Dye" Help Make New Outfits for Youngsters

"Don't worry about perfect results. Use 'Diamond Dye,' guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods, — dresses, blouses, stockings, skirts, children's coats, feathers, draperies, coverings—anything." The Direction Book with each package tells how to dye with ease and ease.

To match any material, have dealer show you "Diamond Dye" Color Card.

### What is the Substitute

(From a Recent Speech by the Hon. A. J. Balfour.)

"The League of Nations has had many critics, but I am not aware that among the multitude of criticisms that have been offered any suggestion makes its appearance for finding a substitute for that organization which we desire to see instituted, I admit, with the great task of preserving the peace of the world. Those who criticize the League of Nations have no substitute for the League of Nations. They are prepared, it seems, for the civilized world to go on in the future as it has gone on in the past, oscillating between those scenes of violence and sanguinary disturbance and the intervals in which great and ambitious nations pile up their armaments for a new effort. To me such an ideal appears to be absolutely intolerable, and I am not prepared seriously to discuss with any man what the future of international relations should be unless he is prepared either to accept in some form or another the League of Nations, or to tell me what substitute he proposes for it."

Women of the Bayand tribe of Central Africa shave the tops of their heads, while the men wear long hair.

Many a man's success leaves a bitter taste in the mouth.

### Samples of Alberta Minerals For England

Alberta Natural Products to Be Put on Exhibition in London

Samples of the bitumen sands from Fort McMurray, natural tar products from the sands, gasoline extracted from natural gas, asphaltum, roofing material from the bitumen sands, some briquettes from Bankhead, coke from the Crow's Nest, and some other of the Alberta natural products were this week sent to Lieut.-Col. Obed. Smith, the immigration officer for Canada in London, England. These are to be put on exhibition at the London office and will be added to from time to time as the material comes to hand.

For Colds or Influenza and as a Preventative, take LAXATIVE BROMO QUININE Tablets. Look for E.W. GROVE'S signature on the box. 30c.

### Alberta Glass Factory

New Addition Will Be Larger Than the Original Plant

Good progress is being made on the large extension to the glass factory at Redcliff, Alberta. The steel construction is completed and the building is well advanced. Experts are on hand to install the furnaces and leads, which when completed will be as large as any on this continent. This new addition will be larger than the original plant, and is expected to be in operation some time in March. The plant is owned by the Dominion Glass Company, and was originally established at Redcliff seven years ago.

### Leverhulme Favors Prohibition

Lord Leverhulme, the British manufacturer, who has returned to England from a visit to the United States, declared himself as in favor of the adoption of prohibition in Great Britain, through which, he said, enough could be saved to pay Britain's indebtedness to America within five years.

### STORMY WEATHER HARD ON BABY

The stormy, blustery weather which we have during February and March is extremely hard on children. Conditions make it necessary for the mother to keep them in the house. They are often confined to overheated, badly ventilated rooms and catch colds which rack their whole system. To guard against this a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. This will not fail to keep up colds, and catch the health of the baby in good condition till the brighter days come along. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Austria Seizes Billions

Confiscated Private Fortunes to Yield State \$2,400,000,000

It is expected by the Austrian government that 12,000,000,000 crowns equivalent to \$2,400,000,000 will be realized from the partial confiscation of private fortunes. This amount will be used in payment for food and raw materials purchased in foreign countries.

Dr. Reutich, Minister of Finance, making a report on the financial situation to the National Assembly, said he hoped soon to obtain a loan of 30,000,000 crowns (\$6,000,000) from Holland. This will also be used to buy food.

**Keep the warmth IN and the cold OUT**  
Have a cup of hot Ozo every day. It will warm you through and through—fortify against chills—ward off colds and shills—and keep you A.L.

**For Coughs, Colds, and the relief of inflammatory conditions of the throat arising from Bronchitis, Asthma, and other ailments of the Respiratory Organs.**

New Brunswick reports the cold, east January in history.

The premier of Quebec has at most definitely decided to keep on Gouin.

E. J. Pozzi has been confined to his home for about a week through illness.

The only thing we know of that hasn't advanced is certain young ladies' ages.

The Stone of England hall at Lethbridge has been purchased by the Masons for a consideration of \$20,000.

By a vote of 350 to 0, Southern Alberta has decided in favor of the erection of an irrigation district covering 190,000 acres.

Calgary is suffering a lemon shortage. Blairmore is not, fortunately. Looks as though we'll have "lemons" for ever and ever.

A strike of 300,000 members of the Brotherhood of Maintenance of Way Employees and Railway Shop Laborers is called for Tuesday, February 16th, at Detroit.

Archib McLeod has returned from a brief visit to Mars. He claims that the little planet is well populated and that prohibition has been in effect there for over thirty years.

Emperor Pick has returned to town from an important business trip during which he secured permission of federal and provincial authorities to sell temperance drinks.

Persistent rumors are to the effect that a well financed concern is considering the purchase of valuable Victoria Street property on which to erect a modern mercantile establishment.

Conductor John Barrieau, first conductor on the Crow branch of the C. P. R., and one of the best known in Western Canada, has retired on a pension after thirty-eight years of faithful and efficient service.

A west-bound auto from Lethbridge, laden with high proof booze, came near spilling at the foot of Bellevue hill on Monday. The car stood on her "beam ends" for about ten seconds, but upright again.

A meeting will be held in the town office on tomorrow (Friday) evening, at 8 o'clock, for the purpose of forming a golf club, improving the golf course and affiliating with the Southern Alberta Golf Association. At this meeting the officers for 1929 will be elected.

Charlie Sartoris and Alex. Moroney are recovering from an attack of flu. William L. Evans, who for a few days was in a very critical condition, is also fast on the mend. The epidemic has apparently reached its height in this district, and very few cases seem to be developing.

British scientists have just discovered a new disease arising out of the war. The new disease is called Fellophobia, and means "hatred of one's fellow men." British medical men define Fellophobia as akin to hydrophobia, which is caused by the bite of a mad dog. Fellophobia is found among returned soldiers in various degrees of malignance.

Who says that people do not read advertisements? Here is one that nobody will miss:

"I have a baby girl I do not want to chloroform, give away or exchange for a dog. If there is anyone in town who will rent us more furnished rooms, please address Blairmore post office."

An advertisement can be made as attractive as the latest scandal and it is properly composed.

Wholesale price of white sugar in Newfoundland is now 19 cents a pound.

Ed. Brown, secretary of the O. B. U., was up from Taber this week.

The new parliament building at Ottawa will be formally opened on February 26th.

Through the activities of Constable Maragesson, of the A. P. P., over six hundred dollars in fines and costs have passed through the coffers at Bellevue the past month or so.

Citizens should use every energy to the betterment of their own town and community, losing sight of their own selfish aims and interests and looking to the greatest good for the greatest number.

United States churches have gained nearly three million members since the last church census was taken in 1916, but there is a marked decrease in the number of Sunday School pupils.

A Frenchman has invented a device that enables a one-armed person to eat eggs. At present prices it requires both hands and some head work to accumulate a dozen.

Is your car protected against fire, theft, collision and property damage or any one of these protections? If not, see J. B. Harmer, agent, in Montalbet's furniture store.

City barbers have raised the price of hair cuts. At the old price, barbers were considered, and they actually were, the greatest hold-ups of all tradesmen; but now their latest action makes the hair of even the bald stand on end.

"I sent you some suggestions, telling you how to make your paper more interesting," remarked a Bellevue friend. "Have you carried out any of my ideas?"

Editor—"Did you meet the office boy with the waste paper basket as you came upstairs?"

"Yes, I did."

Editor—"Well, he was carrying out your ideas!"

Etiskom correspondent to the Lethbridge Herald writes: "Little Faith Sargent had quite an accident last week. She had been playing outside and came in to warm her feet and had taken off her shoes. Her mother had just lifted a pail of boiling water from the stove, and Faith had her feet on the oven door and took one down, putting it by mistake into the boiling water, scalding her foot badly."

A whole shipload of \$4,800,000 worth of whiskey was seized by federal agents in New York harbor on February 3rd. The ship Yarmouth was owned and operated by negroes and had been a mystery ship for some weeks. The day before prohibition came into effect, she sailed for Havana from New York, but after being two days out returned to New York for repairs. While in harbor it was noticed that "repairs" entailed a mighty shrinkage in the whiskey cargo, and finally the authorities caught workmen in the act of smuggling the wet goods ashore.

D. R. McIvor was up from Cowley on Tuesday.

WANTED—Girl for general housework. Apply to The Enterprise.

Mary Rebekah, beloved wife of Rev. William Buchanan, died at Lethbridge last week.

Miss S. W. McColm spent a few days with friends in Cranbrook this week.

In the United States there are more than fifty women who earn their livelihood as blacksmiths.

The initiatory degree will be conferred at the regular I. O. O. F. meeting on Tuesday night next.

In some parts of the world they are voting dry, but in a large portion of Alberta 90 per cent of the people would vote for irrigation.

The population of Canada is now estimated at 8,835,102, and the population of Alberta is placed at approximately 587,790.

A Chicago teacher of the feeble-minded declares some of her pupils are working for higher salaries than she receives.

You need fire insurance on your building or stock, house or furniture. See J. B. Harmer, agent, office in J. Montalbet's furniture store.

A banana-eating contest will be held tonight under the auspices of the Vets' Club. All gluttons are invited to attend and participate.

An Australian inventor has given a piano a slightly curved keyboard so that the player can reach all parts of it with equal effort.

On Thursday evening last, Coleman curlers entertained several rinks from Pincher Creek, and the day's play showed about an even break.

A Chicago judge, in speaking of treasonable agitators, stated that "execution, rather than deportation," was a fitting punishment for such offenses.

Twelve German admirals, two high sea fleet commanders and thirty captains of U-boats are demanded by the entente powers for extradition.

Canada's population is now estimated to be close on nine millions, and it is expected to be over the nine-million mark when the census is taken next year.

An enjoyable whist drive and social evening was held under the auspices of Victoria Rebekah Lodge in the I. O. O. F. hall at Coleman on Tuesday night.

"Discovering a robber in our room," says the editor of an exchange, "we borrowed three dollars from him." It's a case of "The Lord will provide."

Aerial forest patrols are almost certain to be established in Alberta early in the spring. The question is at present under consideration by the air board at Ottawa.

Announcement was made today that January 10th, 1929, was the official date upon which war with Germany terminated. This date was fixed by a royal order.

C. E. F. Hicocks was a visitor to friends in Bellevue and Blairmore on Sunday last. Mr. Hicocks now holds a position in the office of the A. P. P. at Lethbridge.

MacLeod's senior hockey team will play the Coleman seniors on Coleman ice tonight at 8 o'clock. Coleman reports an excellent sheet of ice and with favorable weather a good game is expected.

At a meeting of the Union church board of managers held last night, the resignation of the pastor, the Rev. W. T. Young, was given consideration, and a resolution was passed, asking Mr. Young to reconsider the matter.

It takes six carloads of liquor daily to satisfy Toronto's thirst, and then it isn't satisfied. Out here we are far more civilized, and we believe that Blairmore can do with about a sixth of that amount, while our population is only one two-hundred-and-sixty sixth the size of Toronto. Toronto is sure going to the devil.

### Teachers Show Appreciation

The following resolution was passed at a recent meeting of the Crow's Nest Local of the Alberta Teachers' Alliance, and was presented to the first meeting of the 1929 school board:

"Resolved that we, the members of the Blairmore public school staff, and members of the Crow's Nest Local of the Alberta Teachers' Alliance, do place on record our high appreciation of the 1919 school board, and of the care and attention given by them to the many and varied problems arising out of the conduct of the school."

"Resolved that immediate attention be given to the request for increased salaries (which request has already been handed to the secretary), and that, considering election difficulties, the old board is the proper authority to adjust salaries."

"Resolved that this meeting considers that the best interests of the ratepayers and the school will be best served by setting the minds of the staff at rest on the question of increments."

Signed by Principal Conway and members of the teaching staff of the Blairmore school.

Following receipt of above communication, the board granted substantial salary increases.
